SATT (Startup Acceleration Think Tank) is a wing of Entrepreneurship Cell, VSSUT, Burla formed to bring a revolution in the techno-managerial scape of the University. SATT aims to inculcate novel start-up ideas into the entrepreneurial arena by working in the areas of start-up acceleration, development, enhancement programs and think tank. We provide a platform to the young minds with a raw idea and the willingness to pursue and convert it into a finished product. We help them shape their start-up strategies and build new ones. From the inception of the idea to brainstorming, prototyping, fundraising, planning, and marketing we are very careful about the details because we strongly emphasize over it. We also provide proper guidance by establishing a connection with angel investors to ensure the idea is cushioned from the bud stage to finally grow into a big enterprise and withstand stiff competition.
